

Solutions to satisfy highest standards.

**INTELLIGENT SWITCHING TECHNOLOGY FOR
TIME, TEMPERATURE AND LIGHT CONTROL.**

What options can we offer you to optimize your energy use and lower your costs? What are the different requirements in private and industrial environments? What solutions offer an optimum of precision and efficiency for the users? These are the underlying questions that motivate us in our daily work to exceed the expectations of our customers.

YOUR SENSES...

“Your senses. Our solutions.” is the promise of performance that Grässlin keeps in all of its activities: we are dedicated to people feeling comfortable in their living and working spaces. We do this with reliable product ranges for time, temperature and light control that also help you save precious energy. It is no coincidence that Grässlin has been

esteemed as the trusted and reliable partner of industry, electricians and wholesalers in over 50 countries for more than 50 years. This is ensured by our keen sense for process-oriented and economical solutions that delight the users and ensure the highest possible degree of customer satisfaction.

Time switches

In modern building services the factor of time is crucial to the efficient use of energy. Grässlin time switches fully tap the potentials for efficiency and ensure the highest degree of functionality and convenience in all areas of application.

Room thermostats

Best possible economical use of heat indoors is one of the key tasks of the future. Grässlin room thermostats offer diverse options for sensitive configurations in living and working spaces and at the same time ensure that precious energy is consistently saved.

Light control

Purposeful use of light indoors and outdoors provides security and quality of life. Grässlin light controls offer the greatest degree of functionality, can be aligned to each individual situation and ensure that the user also has a feeling of well-being through easy handling.

Industrial range

Grässlin is a time-tested partner of well-known industrial enterprises, which trust in the high reliability of our products. We custom-design time switches and thermostats for our respective partners and integrate them into the relevant product solutions.

...OUR SOLUTIONS.

Grässlin products and services offer a variety of intelligent solutions for the efficient use of time, temperature and light control both indoors and outdoors. This places a reliable and innovative product range at the disposal of our partners in the industry and in the electrician and wholesale trades with compellingly easy handling that satisfies even the most demanding users.

Intelligent products for the efficient use of time, temperature and light.

OUR EXPERTISE.

Grässlin's core competency is the development and production of solution-oriented and market-driven products in the fields of time switch technology, temperature and light controls. Our extensive product range includes proven classic analog time switches as well as digital devices with daily, weekly and annual programs. Our standard range also includes an impulse and cycle function, vacation programs, ASTRO programs and communication between the switches and with PCs, LANs and other networks. Grässlin additionally offers a sound selection of high-performance products combining normal time switch functions with sen-

sors. These include products such as photoelectric switches and staircase lighting switches. State-of-the-art time switch modules and room thermostats for convenient and energy-saving regulation of heating and cooling systems round off the Grässlin product portfolio. By combining precision, environmental friendliness, easy handling and seamless quality management, Grässlin's products fulfill the highest standards in over 50 countries.

Trusted partner of the industry for innovative and reliable solutions.

OUR INDUSTRIAL RANGE.

The success of long standing partnerships

Grässlin's success story is closely linked with renowned enterprises in the heating and electrical engineering sectors. The combined innovative potential of Grässlin and the market experience of our partners have generated numerous products that work reliably as fixed elements in complex systems and make an intrinsically valuable contribution to our mutual success. Grässlin is dedicated to its function as the supplier of time switch modules and room thermostats and will continue to be committed to the further development of these alliances with new product solutions in the future.

The success of tailored solutions

Grässlin considers each requirement of its OEM partners as a challenge to provide the optimal product solution, which not only fulfills individual tasks, but also ensures high reliability for the long term. Cooperation in development makes synergies and experience potentials useable, which thereby flow into our daily work and are secured in certified processes. The results are market-ready products that can be custom-integrated into our partners' applications.

True comfort

Modern time switch technology from Grässlin makes life in both living and working spaces more pleasant and helps to efficiently save energy. As the dedicated partner of electricians, we support you with an extensive product range. This includes state-of-the-art time switches and room thermostats, which enable your customers to save considerable amounts of energy. Grässlin products are easy to install and also easy for final customers to operate. Grässlin practically pre-programs comfort.

Go on vacation with an easy mind

Grässlin's innovative technology ensures that living spaces remain alive even when no one is home. This means that various household appliances such as lights, roller blinds, radio, television or the furnace are automatically activated at different times. Even the fish in the aquarium can be automatically fed. These are only a few of the many options that Grässlin offers. Grässlin products are simple to integrate and easy to operate.

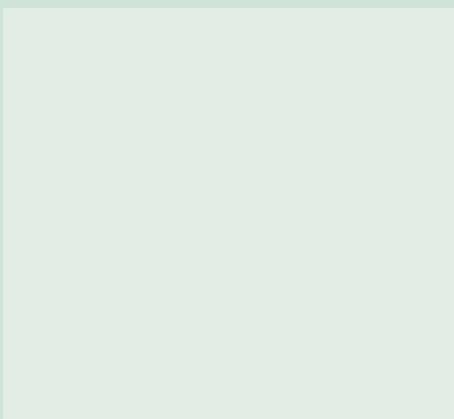

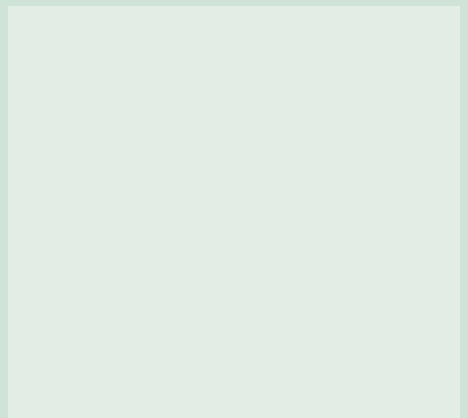

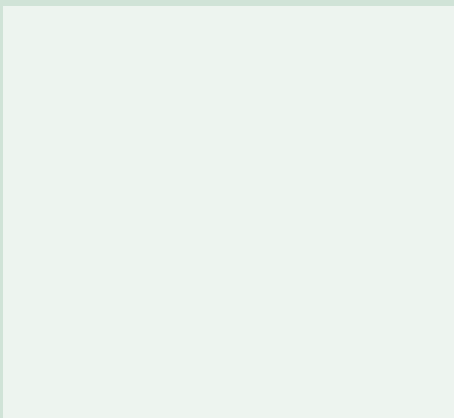

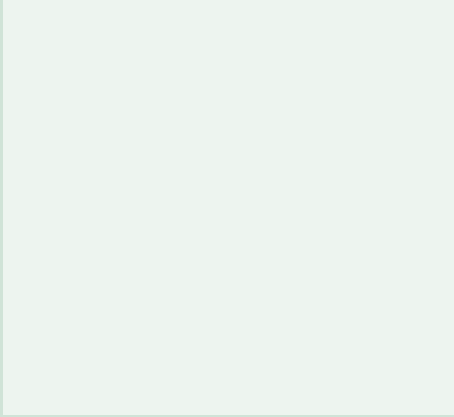

Optimal utilization of building services

By centrally controlling various rooms, Grässlin components provide optimal comfort indoors while also keeping energy costs under control. For example, the heating in the production facility is activated for commencement of work in the morning and the room temperature lowered again after closing. In the summer, the blinds are lowered as needed. Switching technology and room thermostats from Grässlin offer many more options – from solutions for all living quarters, to offices and public facilities.

Reliable partner of the electrician
trade for efficient energy use.
OUR TRADE PROGRAM.

GRÄSSLIN GmbH
is in compliance with
the standard
ISO 9001:2000
Manufacturing of electromechanical
and electronic time switches

An enterprise should be enterprising.

OUR MOTIVATION.

A location with a past and a future

Grässlin was founded in St. Georgen, Germany, in 1956 and has been a pioneer in time switch technology. With a number of inventions, Grässlin was quickly established as an internationally successful specialist for products in the sectors of time switch technology, temperature and light control and is one of the leading companies in the sector worldwide. In 2007, Grässlin joined the Intermatic group, a market leader in time switch technology in the United States, Canada and Mexico, enabling us to implement international expertise as quickly as possible; an advantage that our customers and partners benefit greatly from. Exceptional quality, innovation and user-friendly products combined with 50 years worth of experience form the basis for continuous growth.

Our motivation – to make our customers' lives easier

The top priority at Grässlin is to make the lives of our customers easier in every respect. A simplified operating philosophy and the high precision of Grässlin products give the customer a variety of options to simply and quickly control the elements of time, climate and light. In addition to high-quality and customer-oriented products and solutions we make our customers' lives easier with first-class service from our worldwide network of distributors. Grässlin creates practical, market-driven solutions together with professional support and therefore is the competent partner for your individual needs.

Tried and tested quality

Grässlin products are a special example of quality "made in Germany". As a certified enterprise under ISO 9001:2000, Grässlin guarantees seamless quality management from the idea to the finished product. Think global – act local is the idea behind all our activities. Our worldwide specialists procure the best components, which are then transformed into products of highest precision at our site in St. Georgen. Our state-of-the-art production methods enable us to fulfill even special tasks quickly.

At Grässlin the focus is on people

The only way to maintain clear competitive advantages, and to fulfill and even exceed the demands of our customers and partners is with outstanding performance. The most important capital for this is our staff. Their enthusiasm and their dedication give us a decisive edge over the global competition. We can only achieve excellent performance with highly motivated, committed and skilled employees. Continuous development is a key to our worldwide success. The experience potential and the innovative power of our employees are considered a valuable resource and are constantly enhanced in advanced training programs. Mutual values such as **teamwork, passion, dedication, honesty and customer orientation** characterize the work at Grässlin. The latest production and manufacturing technologies, forward-looking management models and innovative work models contribute to our shared success.

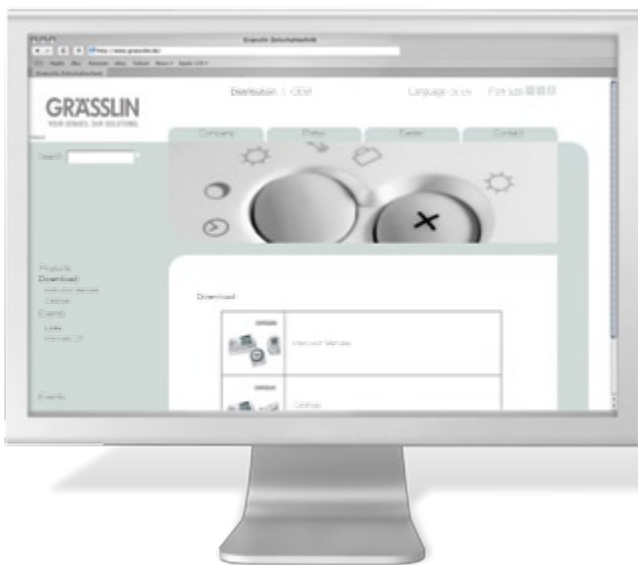

Good service is not only part of our philosophy,
but part of our daily interaction with people.

OUR CUSTOMER SERVICE.

Expertise and service for customers and partners

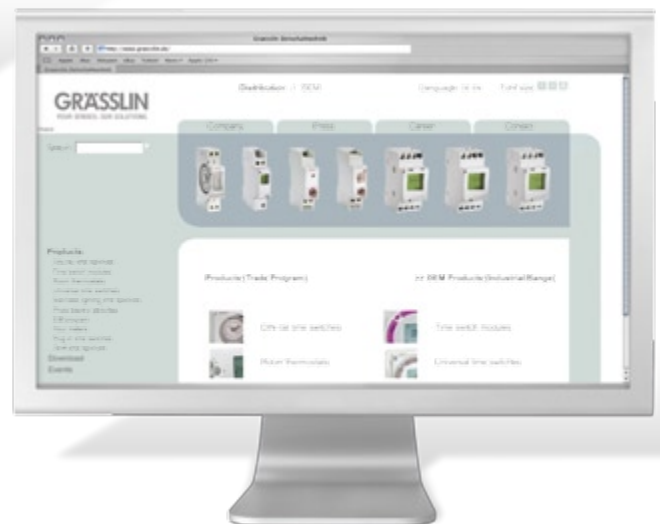

Grässlin has launched an entirely new internet presentation with a number of new service modules for the entire business spectrum paying special attention to user-friendly navigation. Extensive product information, operating instructions and the latest product catalogues are waiting for you in our Download Center. Information and contact data for our national and

international distributors are also available on our website. Our industrial partner portal also offers you access to the latest ideas and innovations and product-specific details. Naturally, we will inform you about tradeshows and events so that you have a head start for implementing your goals with Grässlin.

Competent contacts

Long-standing, trustful relationships are the basis for optimal alignment to national and international markets. Therefore, in sales to the trade sector, Grässlin relies on established distributors and authorized wholesalers. Close cooperation with our local distributors enables Grässlin to more quickly recognize customer requirements and react to change accordingly. The first-class services of our distributors plus our high quality products have been winning over our customers for years. In the same way, Grässlin has been able to expand and solidify its position as a market leader in the industrial sector for years in many countries. Tailored solutions combined with professional expertise and support are the prime contributors to our shared success.
